Prescriptive Analytics

Labor Management

A16/0126

Effortless Compliance Management

Reduce risk and ensure compliance by increasing food safety visibility with continuous temperature monitoring and efficient incident management workflows.
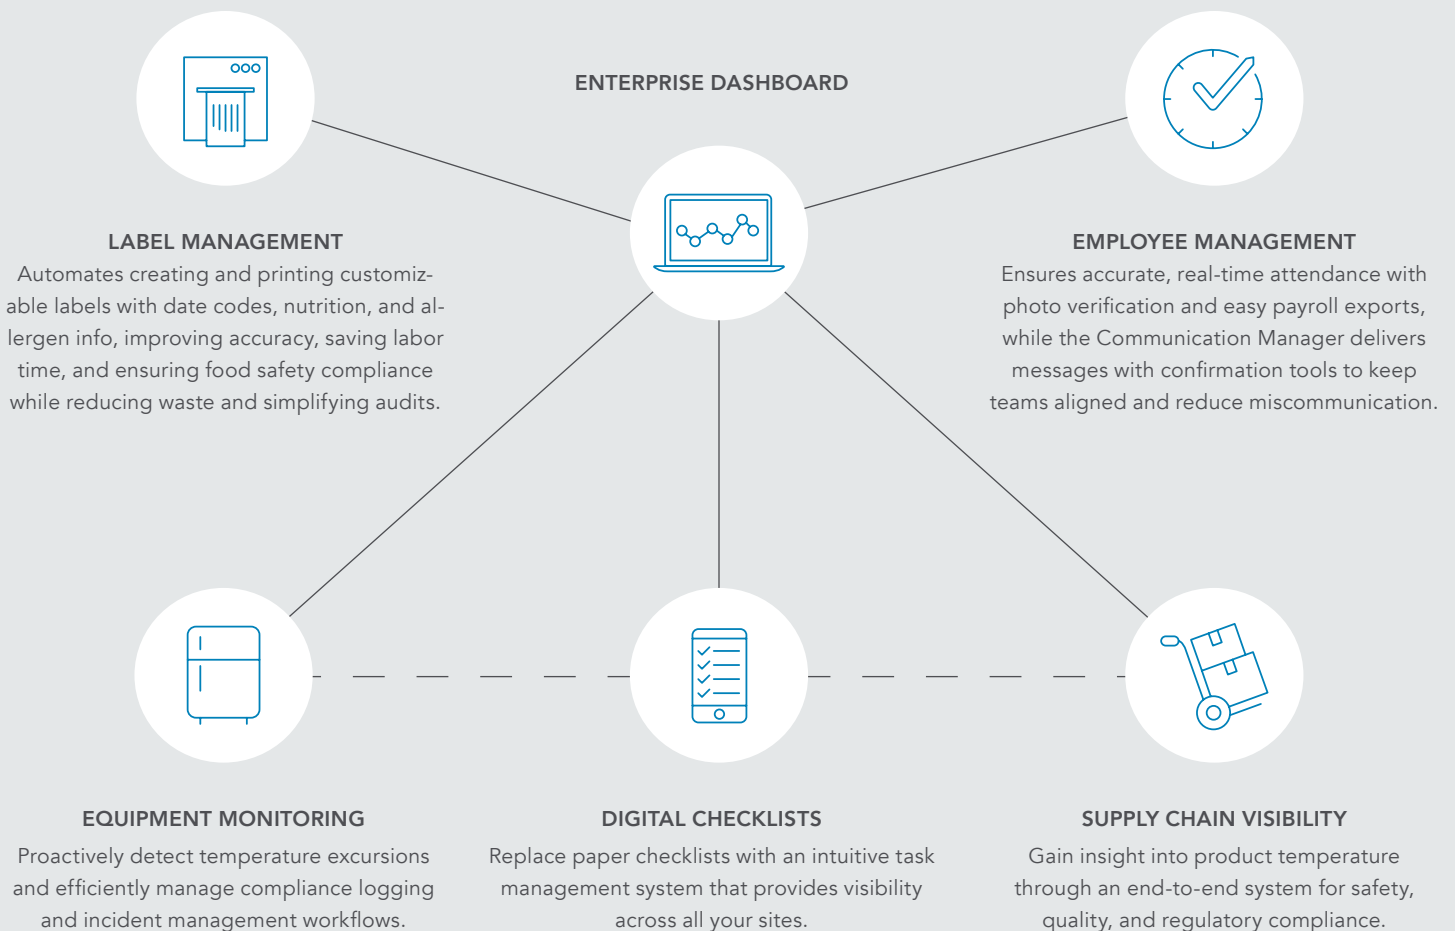

Improved Operations

Replace paper processes with an intuitive task management system that provides visibility across all your sites. Remotely publish and manage operational checklists to improve efficiency and reduce loss.

Simple Risk Mitigation

Gain real-time insights into checklist compliance and easily compare site performance to quickly identify at-risk sites for immediate remediation. Real-time monitoring provides instant alerts for temperature excursions in you organization and throughout the supply chain.

ENTERPRISE DASHBOARD

LABEL MANAGEMENT
Automates creating and printing customizable labels with date codes, nutrition, and allergen info, improving accuracy, saving labor time, and ensuring food safety compliance while reducing waste and simplifying audits.

EMPLOYEE MANAGEMENT
Ensures accurate, real-time attendance with photo verification and easy payroll exports, while the Communication Manager delivers messages with confirmation tools to keep teams aligned and reduce miscommunication.

EQUIPMENT MONITORING
Proactively detect temperature excursions and efficiently manage compliance logging and incident management workflows.

DIGITAL CHECKLISTS
Replace paper checklists with an intuitive task management system that provides visibility across all your sites.

SUPPLY CHAIN VISIBILITY
Gain insight into product temperature through an end-to-end system for safety, quality, and regulatory compliance.

The SmartSense System

The SmartSense system is designed to solve your most important food safety and operational challenges. The system combines wireless sensors and food probes with remote monitoring software, food safety label printing, and digital checklists. The results are actionable insights that drive quality control, employee productivity, and food safety compliance.
Wireless Sensors

Connect any fridge or freezer in minutes with SmartSense's wire-free sensors.

Label Printing Station

Simplify management and printing of back-of-house and retail labels in different sizes and materials.

Bluetooth Probe & Digital Checklist

Improve HACCP efficiency with a Bluetooth food probe and a digital checklist.

The SmartSense Difference

Proactive Insights

Gain visibility with predictive models and simulated product temperature that enable proactive decision making.

Collaborative Monitoring

Drive efficiency with SmartSense's collaborative system for incident management and cross-team workflows.

Deploys in Minutes

Install in minutes with self-provisioning wire-free sensors. Quickly monitor temperature, humidity, tank, energy, and other sensors.

Enterprise Grade

Store & forward technology for lossless monitoring, up to 5-year battery life, IP-67 rated sensors, and AES encryption and certificates.

Compliance Visibility & Efficiency

Meet HACCP and FSMA requirements. Gain visibility into site performance for improved accountability and risk management.
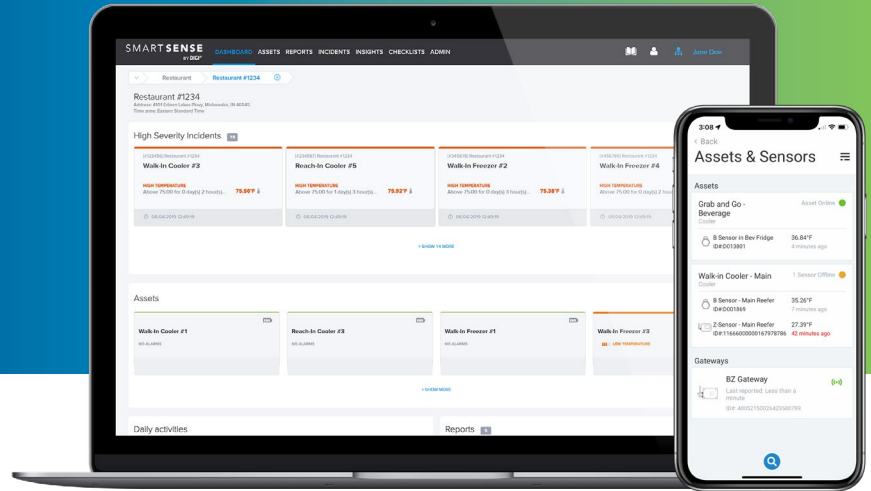

Deployment Experience

We partner with our customers to create world leading systems. We have experience deploying 250 sites per day.

SmartSense Dashboard

SmartSense's cloud-based dashboard provides real-time oversight of your food safety initiatives and visibility into compliance, site performance and risks.

Proactive Insights

Make proactive decisions using SmartSense's patented product simulation that provides insight into actual product temperature as well as ambient temperature.

Team-Based Monitoring

Assign incidents to teammates and track corrective actions from anywhere with SmartSense's collaborative approach to incident and workflow management.

Automate Reports

Receive automated reports by email to replace paper temperature logs. Easily identify chronically failing fridges and sites that have the greatest safety risk.
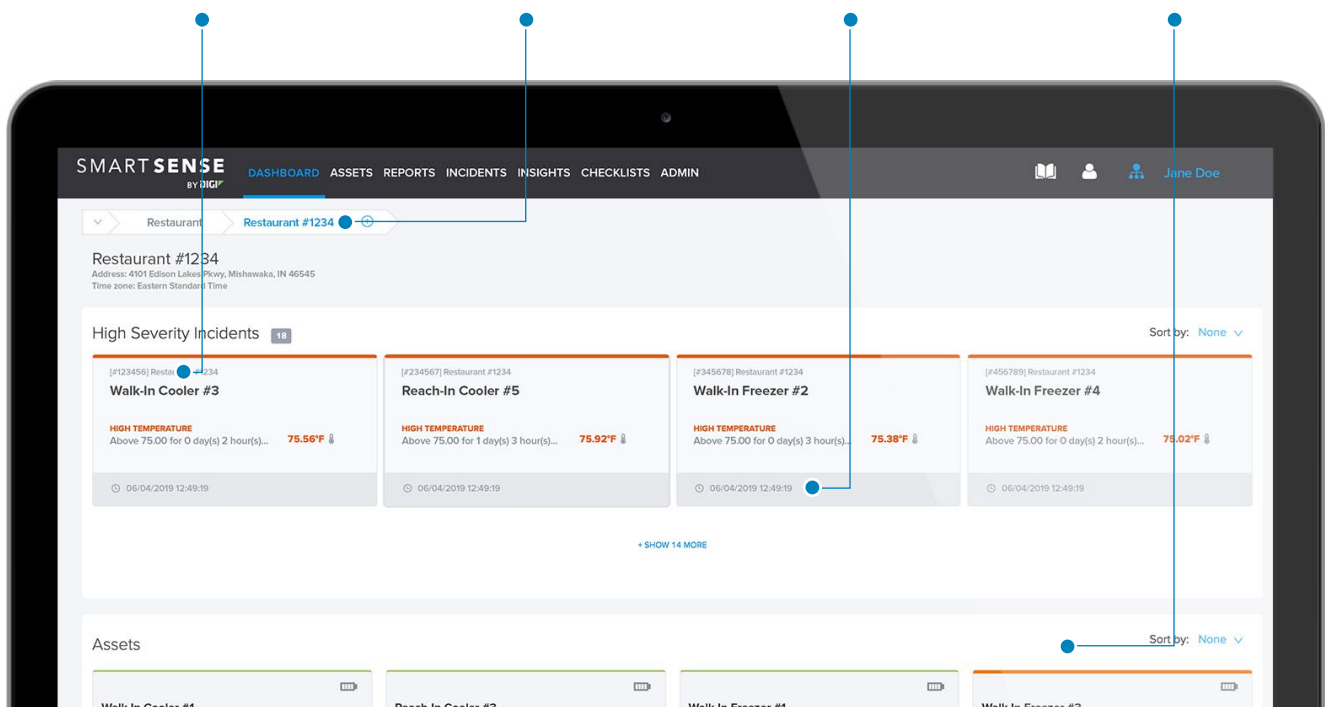

Visibility & Accountability

Gain visibility into your compliance checks and easily measure and compare site performance. Increase accountability with timestamps and signatures.

Prioritize by Severity   **Multi-Location Support**   **Actionable Context**   **Manage by Asset**

Digital Checklists

Jolt digital checklists replace paper checklists with an intuitive task management system that provides visibility across all your sites.

Visibility & Insights

Gain real-time insights into checklist compliance and easily compare site performance. Quickly identify at-risk sites for immediate remediation.

Integrate Equipment Monitoring

Automate equipment monitoring with seamless integration of SmartSense's wireless sensors and Bluetooth probe with the digital checklists.

Task Management

Remotely publish and manage checklists for food safety, quality control, receiving, promotions, and more. Easily customize checklists and instantly push to all your sites.

Automate Reports

Schedule automatic or on-demand reports to replace paper logs and checklists. 2-year historical data log eliminates the need for extensive paper records.

100% Wire-Free Installation

Wireless Sensors & Screens

SmartSense's wireless sensors offer the world's only 100% wire-free installation and wireless screens for deployment in minutes.

Actionable Alerts

Receive both audible and visual notification when sensors are in alarm.

High Contrast Display

High contrast e-ink display provides crystal clear readings.

Easy Install

Sensors automatically connect to your SmartSense gateway to provide a self-provisioning installation process. Centralized configuration is provided through our web-based dashboard.
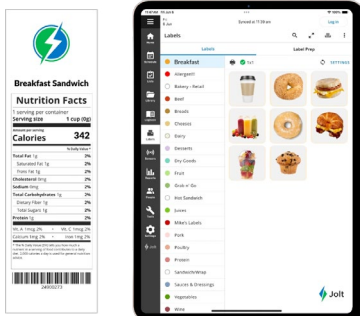

100% Wire-Free

Deploy in minutes with the industry's only sensor that can be placed directly in fridges and freezers - no wires or cords.

Operations Management

Labels

Jolt's labeling system solves common complaints of other label machines. Jolt's labels were built using a template management software to sync all changes to all departments and all locations at once, making sales or price changes easy. Our label hardware saves time with fast printing and large batch printing. Label customers experience high accuracy meaning less reprints and additional time savings.
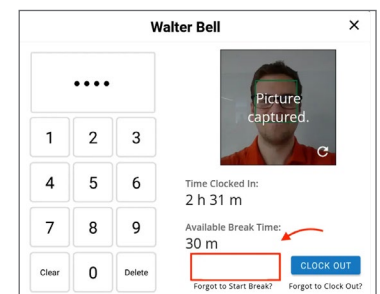

Communication Manager

Communication Manager helps businesses ensure critical information reaches the right people, at the right time, in the right way. When employees log in, they receive notifications and announcements, and managers can track that those messages were not just delivered, but also understood, thanks to built-in quizzes. This ensures communications aren't just seen, but acknowledged, improving clarity and reducing miscommunication.

Time Clock

Time Clock is a full employee time-tracking solution built to enhance accountability and streamline operations. It uses photo capture and face-detection technology to prevent buddy punching (i.e. employees clocking in for each other), and records geolocation data to ensure accurate tracking whether employees are on-site or remote. Managers can monitor attendance in real time from any internet-connected device, flag or block clock-ins that don't match scheduled shifts, and require approvals for exceptions. At the end of each pay period, all the time data can be exported cleanly into payroll systems.

About SmartSense

SmartSense transforms how organizations sense, monitor, and make decisions. Using the Internet of Things (IoT), SmartSense changes the way organizations approach compliance, quality, and opperations.

SmartSense automates monitoring for food safety, pharmacy safety, product quality, and preventive equipment maintenance. Today, SmartSense has earned the trust of the most critical government, commercial, and non-profit institutions in the world. Our systems enable real-time sensor-driven decisions at over 2,000 organizations in 75 countries.
